SUMMARY

B.Tech Information Technology graduate focused on backend and cloud engineering. Built high-availability services and CI/CD pipelines, with hands-on experience in Java, Python, JavaScript, Docker, Kubernetes, Jenkins, AWS, and SQL. Strong interest in system design, cloud infrastructure, and performance optimization.

EDUCATION

B.Tech in Information Technology

Viswajyothi College of Engineering and Technology, Vazhakulam

Higher Secondary (XII) - St. Joseph's HSS, Paingottoor (2020-2022)

SSLC (X) - Sobhana Public School, Kothamangalam

2022 - 2026

CGPA : 6.99

86.5%

87.4%

TECHNICAL SKILLS

- **Languages:** C, Java, Python, JavaScript
- **Frontend / Backend / Frameworks:** React, HTML/CSS, Flutter, Electron, Flask, Node.js
- **Cloud & DevOps:** AWS (EC2, S3, ELB, Lightsail), Docker, Kubernetes, Jenkins
- **Observability / Tools:** Git, GitHub, Prometheus, Grafana, Slack
- **Databases:** MySQL, PostgreSQL

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Architect Associate

INTERNSHIPS

Cydez Technologies - DevOps & Cloud Intern

June 2025

- Deployed scalable website hosting using Amazon Lightsail, EC2, S3, ELB, and Lambda.
- Implemented high-availability infrastructure on AWS with security and monitoring setups.

Intrainz Institute - AI & Web Development Intern

Feb-March 2024

- Worked on AI concepts and full-stack development using Django and React.
- Gained hands-on exposure to real-world web and data-driven projects.

PROJECTS

• BrowserUI - Chromium :

- Built a lightweight Windows desktop browser using **C# · XAML (WinUI 3) · WebView2** with a modular, low-memory architecture.
- Implemented a custom tabbed UI and end-to-end **Visual Studio/.NET** build workflow; Git-based repo prepared for CI and packaging.

• CrowdClue :

- Designed & Dockerized a Flask + React service; automated CI/CD with GitHub Actions · GHCR and deployed to Kubernetes for containerized rolling updates.
- (Tech: Flask(python), React js, Docker, Kubernetes, GitHub Actions)

• Py2C Compiler : Python-to-C transpiler converting subset of Python to optimized C code with lexer tokenization. Gained higher understanding of low-level languages and transpilation process

• GRID Browser :

- Electron-based desktop browser with multi-tab UI and Node.js IPC; includes 3D UI elements using Three.js.
- (Tech: JavaScript, Electron, Node.js, Chromium, HTML/CSS, Three.js)

• Jenkins CI/CD Pipeline for Java App :

- End-to-end pipeline: build & deploy to AWS EC2, artifact management with Nexus, monitoring via Prometheus/Grafana, code quality with SonarQube, and Slack alerts.
- (Tech: Jenkins, AWS, Nexus, Prometheus, Grafana, SonarQube)
